

Compound

A substance composed of two or more elements that are chemically combined to form a new substance

Concentration

A measure of the amount of solute dissolved in a solvent

Element

A substance made of only one kind of atom

Mixture

A combination of substances in which the atoms of the substances are not chemically combined

Periodic Table

A chart in which all the elements are arranged according to the repeating pattern of their properties

Solubility

The maximum amount of solute that can be dissolved in a solvent at a particular temperature, usually expressed in grams of solute per milliliter of solvent

Solute

A substance that has been dissolved

Solution

One substance dissolved in another

Solvent

A substance in which a solute is dissolved
